Security System Integration

Atlas is a true “solutions provider”. Our depth of experience enables us to provide our clients with solutions to their construction challenges that mere distributors cannot offer.

Proposal Partnering – We work with Design & Construction firms to plan the project from the design phase to incorporate the most efficient materials to meet the owner’s needs. We want the owner to be in the most advantageous position on bid day to get the best overall outcome. Our engineers can bring their years of experience from Design Build Projects and Military building to the table to work with you up-front.

Value Added Propositions – We explore all opportunities to save money on the project. Our years of experience and familiarity with multiple product lines allow us to offer our clients comparable performance at the best price. We also offer “one stop shopping” with combination packages that encompass multiple division allowing the contractor / owner to have a single point of contact for the project and reduce coordination issues.

Project Management – Our experienced team of project managers represent the best in the industry. They work closely with the job-site team to insure a smooth project.

Installation – We have installers who can address the specialized requirements of each project. We perform both on-site and off-site installation.

Leed Credits -- We help projects earn Leed credits through the use of Low Emitting Materials, Recycled Content, Regionally Manufactured Materials, and FSC Certified Wood Products.

Special Needs – During the time Atlas has been working in the construction market, we have become the go-to place for the unusual, special, hard-to-find items. If your project is out of the ordinary, look to us to help you find the best solution for you.
